INDICES

Volume 37 (1996)

The editorial board
would like to express its warmest
appreciation and thanks to all

referees and authors

who have contributed to the 1996
issues of Acta Radiologica

SUBJECT INDEX TO VOLUME 37 (1996)

Nervous system (incl. skull)

Size and asymmetry of the planum temporale. A new three-dimensional method for analysis of the supratemporal plane using MR imaging and computer-aided graphics 57
Measurement of blood flow in the superior sagittal sinus in healthy volunteers, and in patients with normal pressure hydrocephalus and idiopathic intracranial hypertension with phase-contrast cine MR imaging 171
MR imaging in solvent-induced chronic toxic encephalopathy 177
Tolerance and efficacy of Omniscan (gadodiamide injection) in MR imaging of the central nervous system 223
Evaluation of time-of-flight and phase-contrast MRA sequences at 1.0 T for diagnosis of carotid artery disease. 1. A phantom and volunteer study 267
Proton MR spectroscopy and MR imaging in acute and chronic multiple sclerosis – ringlike appearances in acute plaques 278
Phosphorous-31 MR spectroscopy in the preoperative evaluation of symptomatic unilateral carotid artery stenosis 288
Type D dural carotid-cavernous fistula. Results of combined treatment with irradiation and particulate embolization 294
Imaging of tuberculosis. III. Tuberculosis as a mimicker of brain tumour 496
Brain penetration of intrathecal iomeprol in dogs . . . 578
Pre- and postoperative MR imaging of craniopharyngiomas 806
Susceptibility contrast imaging of CO_2-induced changes in the blood volume of the human brain . 813
MR imaging of spastic diplegia. The importance of corpus callosum 830
Primary intraosseous meningiomas 937

Ear, nose, throat and eye

Chemoembolization of head and neck cancer with carboplastine microcapsules 52
Petrous bone extension of middle-ear acquired cholesteatoma 166
Videoradiography of patients with habitual snoring and/or sleep apnea. Technical description and presentation of videoradiographic results during sleep concerning occurrence of apnea, type of apnea, and site of obstruction 307
Sleep apnea syndrome. Examination of pharyngeal obstruction with high-speed MR and polysomnography 315
Malignant fibrous histiocytoma of the larynx – a rare case in an adolescent. A case report 321
Rathke's cleft cyst. Two cases with uncommon MR signals 596
Lingual carcinoma. Correlation of MR imaging with histopathological findings 700
CT findings in general practice patients with suspected acute sinusitis 708
MR imaging of the lacrimal gland. Age-related and gender-dependent changes in size and structure . . . 714
Ultrasound-guided fine-needle aspiration cytology of non-palpable supraclavicular lymph nodes in sarcoidosis 896
Thyroid ultrasound findings 7 years after the Chernobyl accident. A comparative epidemiological study in the Bryansk region of Russia 904

Bones, joints and soft tissues

Percutaneous lumbar discectomy. Technique and clinical result 85
MR diagnosis of retropatellar chondral lesions under compression. A comparison with histological findings 91
Posttraumatic spinal osteolysis in ankylosing spondylitis as part of pseudoarthrosis. A case report 98
Effect of bone density of the head on total body DEXA measurements in 100 healthy Swedish women 101
The Royal Princess Anna Vasa. Historical note and radiological examination of her skeleton 124
Radiation dose reduction in computed skeletal radiography. Effect on image quality 128
In vitro study of the accuracy of bone mineral measuring devices in Norway and Sweden 134
MR imaging of skeletal muscle hemangiomas. A report of 16 cases 140
Lumbar disk herniation combined with epidural hematoma. A case report 145
Thin-section CT in the examination of cervical disc herniation. A prospective study with 1-mm axial and helical images 148
Fast spin-echo MR assessment of patients with poor outcome following spinal cervical surgery 153
Reliability of radiological measurements of the distraction gap during leg lengthening 162

Dermatofibrosarcoma protuberans. CT findings with pathologic correlation in 6 cases 362
Postoperative lumbar MR imaging with contrast enhancement. Comparison between symptomatic and asymptomatic patients 366
MR imaging as the primary modality for neuroradiologic evaluation of the lumbar spine. Effects on cost and number of examinations 373
Imaging of tuberculosis. IV. Spinal manifestations in 63 patients 506
Imaging of tuberculosis. V. Peripheral osteoarticular and soft-tissue tuberculosis 512
Spatial resolution requirements in digital radiography of scaphoid fractures. An ROC analysis 555
Conventional radiography and bone scintigraphy in the prognostic evaluation of Legg-Calvé-Perthes disease 561
MR evaluation of mediopatellar plica 567
Painful ankle region in rheumatoid arthritis. Analysis of soft-tissue changes with ultrasonography and MR imaging 572
Review article. MR imaging before arthroscopy in knee joint disorders? 602
Extraforaminal stenosis in the lumbosacral spine. Efficacy of MR imaging in the coronal plane 610
Degenerative changes following anterior cervical discectomy and fusion evaluated by fast spin-echo MR imaging 614
Relations between radiographic trabecular pattern and biomechanical characteristics of human vertebrae 618
Scapholunate distance in children 625
MR arthrography in the diagnosis of rotator cuff tears. Standard spin-echo alone or with fat suppression? 627
Angular configuration of the knee. Comparison of conventional measurements and the QUESTOR Precision Radiography system 633
Postoperative MR imaging and ultrasonography of surgically repaired Achilles tendon ruptures 639
Ultrasonography of the neck splenius capitis muscle. Investigation in a group of young healthy women . 647
Total effective radiation dose from spiral CT and conventional radiography of the pelvis with regard to fracture classification 651
Breast and pectoralis muscle hypoplasia. A mild degree of Poland's syndrome 759
Activity in the gastrointestinal tract after administration of bone-seeking radiopharmaceuticals. Experimental studies in mice 785
MR imaging in recurrent pain after back surgery. A comparative study using standard and high doses of gadolinium contrast agents 858
Radiological measurement of femoral head position in Legg-Calvé-Perthes disease 863
Complicated bone and soft-tissue infections. Imaging with 0.1 T MR and ^{99m}Tc-HMPAO-labeled leukocytes 870
Gadolinium-DTPA-enhanced MR imaging in asymptomatic knees 877
Correspondence. MR imaging of edematous limbs . . 972

Breast

Sensitivity and specificity of MR mammography with histopathological correlation in 250 breasts 208
Breast and pectoralis muscle hypoplasia. A mild degree of Poland's syndrome 759
Spindle cell lipoma of the breast. A case report 893

Cardiovascular system

Review article. MR angiography of abdominal and peripheral arteries. Techniques and clinical applications 3
Myocardial cell death in reperfused and nonreperfused myocardial infarctions. MR imaging with dysprosium-DTPA-BMA in the pig 18
Double-contrast MR imaging of reperfused porcine myocardial infarction. An experimental study using Gd-DTPA-BMA and Dy-DTPA-BMA 27
Long-term results of percutaneous transluminal angioplasty in renovascular hypertension 36
Duplex US of the external carotid artery 41
Traumatic bilateral carotid-cavernous fistulas treated with detachable balloon. A case report 46
Carotid-cavernous sinus fistula and aneurysmal rupture associated with fibromuscular dysplasia. A case report 49
Immediate and late adverse reactions in coronary angiography. A comparison between iodixanol and ioxaglate 218
Prevention of intimal hyperplasia by irradiation. An experimental study in rabbits 229
Evaluation of time-of-flight and phase-contrast MRA sequences at 1.0 T for diagnosis of carotid artery disease. 1. A phantom and volunteer study 267
Phosphorous-31 MR spectroscopy in the preoperative evaluation of symptomatic unilateral carotid artery stenosis 288
Type D dural carotid-cavernous fistula. Results of combined treatment with irradiation and particulate embolization 294
Factors predicting the outcome of intraarterial thrombolysis in peripheral arterial and graft occlusions . 299
Radiation-induced skin injury after percutaneous transluminal coronary angioplasty. Case report . . . 305
Cervicocranial artery dissection. Detection by Doppler ultrasound and MR angiography 529
Percutaneous superselective coil-embolization of intrarenal arteriovenous fistulas. Case reports 539
Percutaneous transluminal treatment of an iliac pseudoaneurysm with endoprosthesis implantation 542
Coronary angiographic finding of thrombus in the left atrial appendage 749

Normal nonuniformity of left ventricular contraction. Assessment by cine MR imaging with presaturation myocardial tagging 767
CT-guided pericardiocentesis 775
Microcatheter embolization of arteriovenous fistulas in the subclavian region. Report on three cases 900
Effects of ionic and nonionic contrast media on endothelium and on arterial thrombus formation 954

Mediastinum and respiratory system

Ultrasound at scintigraphic "intermediate probability of pulmonary embolism" 14
Dynamic range control processing of digital chest images. A clinical evaluation 107
A simple way to indicate pulmonary nodules at thoracoscopic wedge resections 234
Long-term follow-up of residual mediastinal masses in treated Hodgkin's disease using MR imaging 323
Ultrasonographically guided fine-needle aspiration biopsy of intrathoracic tumors 327
Phantom study of chest radiography with storage phosphor, selenium, and film-screen systems 332
Clinical impact of adrenal expansive lesions in bronchial carcinoma 343
Imaging of tuberculosis – experience from 503 patients. I. Tuberculosis of the chest 482
Prognostic significance of pathological chest radiography in transplant patients affected by cytomegalovirus and/or pneumocystis carinii 727
Effects of varying filter kernel sizes on the image quality of interstitial diseases 732
Rater agreement in lung scintigraphy 754
^{99m}Tc tetrofosmin uptake in lung cancer. A case report 763
Non-cardiogenic pulmonary oedema after intravenous administration of non-ionic contrast media 823
ROC-analysis of detection performance by analogue and digital plain film systems in chest radiography 847
Imaging approach to the diagnosis of pulmonary sequestration 883
Crescentic and ring-shaped opacities. CT features in two cases of bronchiolitis obliterans organizing pneumonia (BOOP) 889

Digestive tract

Conventional radiography and ultrasonography in the diagnosis of small bowel obstruction and strangulation 186
Phantom gastric mucosa for evaluating computed radiography in double-contrast upper gastrointestinal examinations 204
Changes in the anal sphincter with age. An endosonographic study 357
Imaging of tuberculosis. II. Abdominal manifestations in 112 patients 489
Simplified percutaneous gastrostomy 535
Radiological bile acid absorption test ^{75}SeHCAT in patients with diarrhoea of unknown cause 672
Ferristene as intestinal MR contrast agent. Distribution and safety of a fast ingestion procedure with oral metoclopramide 676
MR imaging, CT and CEA scintigraphy in the diagnosis of local recurrence of rectal carcinoma 779
Preoperative staging of rectal carcinoma using double-contrast MR imaging. Technical aspects and early clinical experiences 791
Endosonography for preoperative staging of rectal tumours 799

Liver, biliary tract

A new liposomal contrast medium for CT of the liver. An imaging study in a rabbit tumour model 63
Small hepatocellular carcinoma. Detection with US, CT, MR imaging, DSA, and Lipiodol-CT 69
MR imaging of liver cirrhosis. Role of fibrous septa in visualization of regenerating nodules 198
CT and MR imaging of the liver using liver-specific contrast media. A comparative study in a tumour model 242
Detection of hepatocellular carcinoma by intraarterially enhanced ultrasonography with CO_2 microbubbles. Comparison with DSA, dynamic CT, and Lipiodol CT 250
Radiographic features of lobar agenesis of the liver . . 255
Palliation of malignant obstructive jaundice. Use of self-expandable stents 259
Complications following high-dose percutaneous ethanol injection into hepatic tumors 655
Helical CT in the examination of bile duct obstruction 660
Assessment of early radiation effects on the liver. Comparison of SPECT and MR 665
Intrahepatic portal-hepatic venous shunts demonstrated by US, CT, and MR imaging 680
Portal vein thrombosis mimicking tumour and causing obstructive jaundice. A case report 685
Delineation of segmental liver anatomy. Comparison of ultrasonography, spiral CT and MR imaging for preoperative localization of focal liver lesions to specific hepatic segments 691
Wedge-shaped lesion in the liver seen on postoperative CT. Probable thromboembolic phenomenon in the portal venous system 910
Radiological findings in biliary fistula and gallstone ileus 917

Spleen, pancreas

Percutaneous pancreatography under ultrasonographic guidance 75
3DFT-FLASH MR imaging of pancreatic cancer with gadopentetate dimeglumine 190

Percutaneous drainage of intrasplenic pancreatic pseudocyst. Case report 195

Abdomen

US and CT findings in the diagnosis of tuberculous peritonitis 517
Lymph nodes in the hepato-duodenal ligament. A comparison between ultrasound and low-field MR imaging 521

Urogenital system

Long-term results of percutaneous transluminal angioplasty in renovascular hypertension 36
MR velocity mapping measurement of renal artery blood flow in patients with impaired kidney function 79
Positron emission tomography in the diagnosis and staging of urinary bladder cancer 180
Focal residual contrast media in the kidney 24 hours after angiography 348
Ultrasound and soft-tissue radiography to monitor local interferon-α2B treatment in Peyronie's disease . 352
Transurethral microwave thermotherapy. A comparison between clinical outcome and morphologic effects assessed by urethrography 524
Iohexol clearance for renal function measurement in gynaecologic cancer patients 582
Effects of isosmolar contrast media on the renal cortical blood flow in mice 587
Effects of mannitol and iohexol infusions on the renal cortical blood flow in dehydrated mice 591
Gd-DTPA in male urethrography. A case report 804
"Aggressive" renal angiomyolipoma 927
Effect of transurethral microwave thermotherapy. An evaluation with MR imaging 933
Effects of the low-osmolality contrast medium ioversol (Optiray) on renal function in a geriatric population 950
Effect of iomeprol on renal function immediately after abdominal angiography 962

Endocrine system

Clinical impact of adrenal expansive lesions in bronchial carcinoma 343
Retroperitoneal hemorrhage due to a ruptured adrenal myelolipoma. A case report 688
Value of ultrasonography, CT and MR imaging in the diagnosis of primary hyperparathyroidism 720

Lymphatic system

Lymph nodes in the hepato-duodenal ligament. A comparison between ultrasound and low-field MR imaging 521
Ultrasound-guided fine-needle aspiration cytology of non-palpable supraclavicular lymph nodes in sarcoidosis 896

Pediatric radiology

Examination technique, image quality, and patient dose in paediatric radiology. A survey including 19 Swedish hospitals 337
Scapholunate distance in children 625
Thyroid ultrasound findings 7 years after the Chernobyl accident. A comparative epidemiological study in the Bryansk region of Russia 904

Digital radiography

Spatial resolution requirements in digital radiography of scaphoid fractures. An ROC analysis 555
Effects of varying filter kernel sizes on the image quality of interstitial diseases 732
The full-scale PACS archive. A prerequisite for the filmless hospital 838
ROC-analysis of detection performance by analogue and digital plain film systems in chest radiography 847

Ultrasonography

Ultrasound at scintigraphic "intermediate probability of pulmonary embolism" 14
Duplex US of the external carotid artery 41
Small hepatocellular carcinoma. Detection with US, CT, MR imaging, DSA, and Lipiodol-CT 69
Percutaneous pancreatography under ultrasonographic guidance 75
Conventional radiography and ultrasonography in the diagnosis of small bowel obstruction and strangulation 181
Detection of hepatocellular carcinoma by intraarterially enhanced ultrasonography with CO_2 microbubbles. Comparison with DSA, dynamic CT, and Lipiodol CT 250
Ultrasonographically guided fine-needle aspiration biopsy of intrathoracic tumors 327
Ultrasound and soft-tissue radiography to monitor local interferon-α2B treatment in Peyronie's disease . 352
Changes in the anal sphincter with age. An endosonographic study 357
Cervicocranial artery dissection. Detection by Doppler ultrasound and MR angiography 529
Reproducibility of Doppler ultrasound measurements 545
Painful ankle region in rheumatoid arthritis. Analysis of soft-tissue changes with ultrasonography and MR imaging 572
Ultrasonography of the neck splenius capitis muscle. Investigation in a group of young healthy women . 647

Intrahepatic portal-hepatic venous shunts demonstrated by US, CT, and MR imaging 680
Value of ultrasonography, CT and MR imaging in the diagnosis of primary hyperparathyroidism 720
Endosonography for preoperative staging of rectal tumours 799
Imaging approach to the diagnosis of pulmonary sequestration 883
Thyroid ultrasound findings 7 years after the Chernobyl accident. A comparative epidemiological study in the Bryansk region of Russia 904
Radiological findings in biliary fistula and gallstone ileus 917
"Aggressive" renal angiomyolipoma 927

CT

A new liposomal contrast medium for CT of the liver. An imaging study in a rabbit tumour model 63
Small hepatocellular carcinoma. Detection with US, CT, MR imaging, DSA, and Lipiodol-CT 69
Thin-section CT in the examination of cervical disc herniation. A prospective study with 1-mm axial and helical images 148
CT and MR imaging of the liver using liver-specific contrast media. A comparative study in a tumour model 242
Dermatofibrosarcoma protuberans. CT findings with pathologic correlation in 6 cases 362
Total effective radiation dose from spiral CT and conventional radiography of the pelvis with regard to fracture classification 651
Helical CT in the examination of bile duct obstruction 660
Intrahepatic portal-hepatic venous shunts demonstrated by US, CT, and MR imaging 680
Delineation of segmental liver anatomy. Comparison of ultrasonography, spiral CT and MR imaging for preoperative localization of focal liver lesions to specific hepatic segments 691
CT findings in general practice patients with suspected acute sinusitis 708
Value of ultrasonography, CT and MR imaging in the diagnosis of primary hyperparathyroidism 720
MR imaging, CT and CEA scintigraphy in the diagnosis of local recurrence of rectal carcinoma 779
Software upgrading in a CT scanner. Influence on quantitative CT 855
Imaging approach to the diagnosis of pulmonary sequestration 883
Crescentic and ring-shaped opacities. CT features in two cases of bronchiolitis obliterans organizing pneumonia (BOOP) 889
Wedge-shaped lesion in the liver seen on postoperative CT. Probable thromboembolic phenomenon in the portal venous system 910
Radiological findings in biliary fistula and gallstone ileus 917
"Aggressive" renal angiomyolipoma 927

MR imaging and spectroscopy

Review article. MR angiography of abdominal and peripheral arteries. Techniques and clinical applications 3
Myocardial cell death in reperfused and nonreperfused myocardial infarctions. MR imaging with dysprosium-DTPA-BMA in the pig 18
Double-contrast MR imaging of reperfused porcine myocardial infarction. An experimental study using Gd-DTPA-BMA and Dy-DTPA-BMA 27
Size and asymmetry of the planum temporale. A new three-dimensional method for analysis of the supratemporal plane using MR imaging and computer-aided graphics 57
Small hepatocellular carcinoma. Detection with US, CT, MR imaging, DSA, and Lipiodol-CT 69
MR velocity mapping measurement of renal artery blood flow in patients with impaired kidney function 79
MR diagnosis of retropatellar chondral lesions under compression. A comparison with histological findings 91
MR imaging of skeletal muscle hemangiomas. A report of 16 cases 140
Fast spin-echo MR assessment of patients with poor outcome following spinal cervical surgery 153
Measurement of blood flow in the superior sagittal sinus in healthy volunteers, and in patients with normal pressure hydrocephalus and idiopathic intracranial hypertension with phase-contrast cine MR imaging 171
MR imaging in solvent-induced chronic toxic encephalopathy 177
3DFT-FLASH MR imaging of pancreatic cancer with gadopentetate dimeglumine 190
MR imaging of liver cirrhosis. Role of fibrous septa in visualization of regenerating nodules 198
Sensitivity and specificity of MR mammography with histopathological correlation in 250 breasts 208
Tolerance and efficacy of Omniscan (gadodiamide injection) in MR imaging of the central nervous system 223
CT and MR imaging of the liver using liver-specific contrast media. A comparative study in a tumour model 242
Evaluation of time-of-flight and phase-contrast MRA sequences at 1.0 T for diagnosis of carotid artery disease. 1. A phantom and volunteer study 267
Proton MR spectroscopy and MR imaging in acute and chronic multiple sclerosis – ringlike appearances in acute plaques 278
Phosphorous-31 MR spectroscopy in the preoperative evaluation of symptomatic unilateral carotid artery stenosis 288
Sleep apnea syndrome. Examination of pharyngeal obstruction with high-speed MR and polysomnography 315

Long-term follow-up of residual mediastinal masses in treated Hodgkin's disease using MR imaging 323
Postoperative lumbar MR imaging with contrast enhancement. Comparison between symptomatic and asymptomatic patients 366
MR imaging as the primary modality for neuroradiologic evaluation of the lumbar spine. Effects on cost and number of examinations 373, 381
Lymph nodes in the hepato-duodenal ligament. A comparison between ultrasound and low-field MR imaging 521
Cervicocranial artery dissection. Detection by Doppler ultrasound and MR angiography 529
MR imaging in the presence of small circular metallic implants. Assessment of thermal injuries 551
MR evaluation of mediopatellar plica 567
Painful ankle region in rheumatoid arthritis. Analysis of soft-tissue changes with ultrasonography and MR imaging 572
Rathke's cleft cyst. Two cases with uncommon MR signals 596
Review article. MR imaging before arthroscopy in knee joint disorders? 602
Extraforaminal stenosis in the lumbosacral spine. Efficacy of MR imaging in the coronal plane 610
Degenerative changes following anterior cervical discectomy and fusion evaluated by fast spin-echo MR imaging 614
MR arthrography in the diagnosis of rotator cuff tears. Standard spin-echo alone or with fat suppression? 627
Postoperative MR imaging and ultrasonography of surgically repaired Achilles tendon ruptures 639
Assessment of early radiation effects on the liver. Comparison of SPECT and MR 665
Ferristene as intestinal MR contrast agent. Distribution and safety of a fast ingestion procedure with oral metoclopramide 676
Intrahepatic portal-hepatic venous shunts demonstrated by US, CT, and MR imaging 680
Delineation of segmental liver anatomy. Comparison of ultrasonography, spiral CT and MR imaging for preoperative localization of focal liver lesions to specific hepatic segments 691
Lingual carcinoma. Correlation of MR imaging with histopathological findings 700
MR imaging of the lacrimal gland. Age-related and gender-dependent changes in size and structure ... 714
Value of ultrasonography, CT and MR imaging in the diagnosis of primary hyperparathyroidism 720
Normal nonuniformity of left ventricular contraction. Assessment by cine MR imaging with presaturation myocardial tagging 767
MR imaging, CT and CEA scintigraphy in the diagnosis of local recurrence of rectal carcinoma 779
Preoperative staging of rectal carcinoma using double-contrast MR imaging. Technical aspects and early clinical experiences 791
Gd-DTPA in male urethrography. A case report 804
Pre- and postoperative MR imaging of craniopharyngiomas 806
Susceptibility contrast imaging of CO_2-induced changes in the blood volume of the human brain . 813
MR imaging in recurrent pain after back surgery. A comparative study using standard and high doses of gadolinium contrast agents 858
Complicated bone and soft-tissue infections. Imaging with 0.1 T MR and ^{99m}Tc-HMPAO-labeled leukocytes 870
Gadolinium-DTPA-enhanced MR imaging in asymptomatic knees 877
Imaging approach to the diagnosis of pulmonary sequestration 883
Comparison between conventional and fast spin-echo STIR sequences 943
Correspondence. MR imaging of edematous limbs .. 972

Nuclear radiology

Ultrasound at scintigraphic "intermediate probability of pulmonary embolism" 14
Positron emission tomography in the diagnosis and staging of urinary bladder cancer 180
Conventional radiography and bone scintigraphy in the prognostic evaluation of Legg-Calvé-Perthes disease 561
Assessment of early radiation effects on the liver. Comparison of SPECT and MR 665
Radiological bile acid absorption test ^{75}SeHCAT in patients with diarrhoea of unknown cause 672
Rater agreement in lung scintigraphy 754
^{99m}Tc tetrofosmin uptake in lung cancer. A case report 763
MR imaging, CT and CEA scintigraphy in the diagnosis of local recurrence of rectal carcinoma 779
Activity in the gastrointestinal tract after administration of bone-seeking radiopharmaceuticals. Experimental studies in mice 785
Complicated bone and soft-tissue infections. Imaging with 0.1 T MR and ^{99m}Tc-HMPAO-labeled leukocytes 870

Interventional radiology

Long-term results of percutaneous transluminal angioplasty in renovascular hypertension 36
Traumatic bilateral carotid-cavernous fistulas treated with detachable balloon. A case report 46
Percutaneous lumbar discectomy. Technique and clinical result 85
Percutaneous drainage of intrasplenic pancreatic pseudocyst. Case report 195
A simple way to indicate pulmonary nodules at thoracoscopic wedge resections 234

Palliation of malignant obstructive jaundice. Use of self-expandable stents 259
Type D dural carotid-cavernous fistula. Results of combined treatment with irradiation and particulate embolization 294
Factors predicting the outcome of intraarterial thrombolysis in peripheral arterial and graft occlusions . 299
Ultrasonographically guided fine-needle aspiration biopsy of intrathoracic tumors 327
Transurethral microwave thermotherapy. A comparison between clinical outcome and morphologic effects assessed by urethrography 524
Simplified percutaneous gastrostomy 535
Percutaneous superselective coil-embolization of intrarenal arteriovenous fistulas. Case reports 539
Percutaneous transluminal treatment of an iliac pseudoaneurysm with endoprosthesis implantation 542
Complications following high-dose percutaneous ethanol injection into hepatic tumors 655
CT-guided pericardiocentesis 775
Microcatheter embolization of arteriovenous fistulas in the subclavian region. Report on three cases 900
Effect of transurethral microwave thermotherapy. An evaluation with MR imaging 933

Experimental radiology

Conditioned taste aversion in rats following intrathecal administration of contrast media 116
Reliability of radiological measurements of the distraction gap during leg lengthening 162
MR imaging in solvent-induced chronic toxic encephalopathy 177
Phantom gastric mucosa for evaluating computed radiography in double-contrast upper gastrointestinal examinations 204
Influence of a non-ionic radiography contrast medium on the microcirculation 214
Immediate and late adverse reactions in coronary angiography. A comparison between iodixanol and ioxaglate 218
Prevention of intimal hyperplasia by irradiation. An experimental study in rabbits 229
Fragmented platinum microcoils as embolization material. Preliminary evaluation *in vivo* 696
Toxicity of ethanol in low concentrations. Experimental evaluation in cell culture 923

Contrast media and other drugs

Myocardial cell death in reperfused and nonreperfused myocardial infarctions. MR imaging with dysprosium-DTPA-BMA in the pig 18
Double-contrast MR imaging of reperfused porcine myocardial infarction. An experimental study using Gd-DTPA-BMA and Dy-DTPA-BMA 27
A new liposomal contrast medium for CT of the liver. An imaging study in a rabbit tumour model 63
Small hepatocellular carcinoma. Detection with US, CT, MR imaging, DSA, and Lipiodol-CT 69
Conditioned taste aversion in rats following intrathecal administration of contrast media 116
Influence of a non-ionic radiography contrast medium on the microcirculation 214
Immediate and late adverse reactions in coronary angiography. A comparison between iodixanol and ioxaglate 218
Tolerance and efficacy of Omniscan (gadodiamide injection) in MR imaging of the central nervous system . 223
CT and MR imaging of the liver using liver-specific contrast media. A comparative study in a tumour model 242
Detection of hepatocellular carcinoma by intraarterially enhanced ultrasonography with CO_2 microbubbles. Comparison with DSA, dynamic CT, and Lipiodol CT 250
Focal residual contrast media in the kidney 24 hours after angiography 348
Postoperative lumbar MR imaging with contrast enhancement. Comparison between symptomatic and asymptomatic patients 366
Brain penetration of intrathecal iomeprol in dogs . . . 578
Iohexol clearance for renal function measurement in gynaecologic cancer patients 582
Effects of isosmolar contrast media on the renal cortical blood flow in mice 587
Effects of mannitol and iohexol infusions on the renal cortical blood flow in dehydrated mice 591
Ferristene as intestinal MR contrast agent. Distribution and safety of a fast ingestion procedure with oral metoclopramide 676
Gd-DTPA in male urethrography. A case report 804
Non-cardiogenic pulmonary oedema after intravenous administration of non-ionic contrast media 823
Elimination of ioversol by hemodialysis 826
MR imaging of spastic diplegia. The importance of corpus callosum 830
Gadolinium-DTPA-enhanced MR imaging in asymptomatic knees 877
Toxicity of ethanol in low concentrations. Experimental evaluation in cell culture 923
Effects of the low-osmolality contrast medium ioversol (Optiray) on renal function in a geriatric population 950
Effects of ionic and nonionic contrast media on endothelium and on arterial thrombus formation 954
Effect of iomeprol on renal function immediately after abdominal angiography 962
Elimination of low-osmolality contrast media by hemodialysis 966

Physics and techniques

MR velocity mapping measurement of renal artery blood flow in patients with impaired kidney function 79

Effect of bone density of the head on total body DEXA measurements in 100 healthy Swedish women 101
Dynamic range control processing of digital chest images. A clinical evaluation 107
Radiation dose reduction in computed skeletal radiography. Effect on image quality 128
In vitro study of the accuracy of bone mineral measuring devices in Norway and Sweden 134
3DFT-FLASH MR imaging of pancreatic cancer with gadopentetate dimeglumine 190
Radiation-induced skin injury after percutaneous transluminal coronary angioplasty. Case report . . . 305
Videoradiography of patients with habitual snoring and/or sleep apnea. Technical description and presentation of videoradiographic results during sleep concerning occurrence of apnea, type of apnea, and site of obstruction 307
Sleep apnea syndrome. Examination of pharyngeal obstruction with high-speed MR and polysomnography 315
Phantom study of chest radiography with storage phosphor, selenium, and film-screen systems 332
Examination technique, image quality, and patient dose in paediatric radiology. A survey including 19 Swedish hospitals 337
MR imaging in the presence of small circular metallic implants. Assessment of thermal injuries 551
Relations between radiographic trabecular pattern and biomechanical characteristics of human vertebrae 618
Total effective radiation dose from spiral CT and conventional radiography of the pelvis with regard to fracture classification 651
Volume imaging in fluoroscopy. A clinical prototype system based on a generalized digital tomosynthesis technique 741
Software upgrading in a CT scanner. Influence on quantitative CT 855
Comparison between conventional and fast spin-echo STIR sequences 943
Elimination of low-osmolality contrast media by hemodialysis 966

Research and methodology

Chemoembolization of head and neck cancer with carboplastine microcapsules 52
Size and asymmetry of the planum temporale. A new three-dimensional method for analysis of the supratemporal plane using MR imaging and computer-aided graphics 57
Reproducibility of Doppler ultrasound measurements 545
MR imaging in the presence of small circular metallic implants. Assessment of thermal injuries 551
Spatial resolution requirements in digital radiography of scaphoid fractures. An ROC analysis 555
Relations between radiographic trabecular pattern and biomechanical characteristics of human vertebrae 618
Scapholunate distance in children 625
Angular configuration of the knee. Comparison of conventional measurements and the QUESTOR Precision Radiography system 633
Postoperative MR imaging and ultrasonography of surgically repaired Achilles tendon ruptures 639
Assessment of early radiation effects on the liver. Comparison of SPECT and MR 665
Fragmented platinum microcoils as embolization material. Preliminary evaluation *in vivo* 696
Volume imaging in fluoroscopy. A clinical prototype system based on a generalized digital tomosynthesis technique 741
Normal nonuniformity of left ventricular contraction. Assessment by cine MR imaging with presaturation myocardial tagging 767
Susceptibility contrast imaging of CO_2-induced changes in the blood volume of the human brain . 813
Elimination of ioversol by hemodialysis 826
MR imaging of spastic diplegia. The importance of corpus callosum 830
The full-scale PACS archive. A prerequisite for the filmless hospital 838
ROC-analysis of detection performance by analogue and digital plain film systems in chest radiography 847
Radiological measurement of femoral head position in Legg-Calvé-Perthes disease 863
Thyroid ultrasound findings 7 years after the Chernobyl accident. A comparative epidemiological study in the Bryansk region of Russia 904

Miscellaneous

The Royal Princess Anna Vasa. Historical note and radiological examination of her skeleton 124
Diagnostic radiology in Denmark. Persons and organizations 384
Development of radiology in Finland 388
The introduction of medical radiology into Iceland. Early pioneering and later developments 392
Medical radiology in Norway 404
Swedish radiology as reflected in *Acta Radiologica* . . 412
History of panoramic radiology 441
Low-field MR imaging – development in Finland . . . 446
The history of Swedish neuroradiology 455
Radiation physics in *Acta Radiologica* 472
